Contents

Original Articles

The research on hybrid drive and control technique of high-speed motorized spindle based on adaptive fuzzy neural network control
X-a Chen, W-t Shan, Y He, Y-y Lu and J-f Liu

Theoretical and experimental studies of a switched inertance hydraulic system
M Pan, N Johnston, A Plummer, S Kudzma and A Hillis

Imperialist competitive algorithm–based adaptive fuzzy control of a pneumatic actuator
AR Ahmadi, AR Tavakolpour-Saleh and AM Yazdani

Robust adaptive control for single input/single output discrete systems via multi-model switching
L Yu, S Fei and W Qian

A controller–observer scheme for nonlinear bilateral teleoperation systems
K Baghestan, SM Rezaei, HA Talebi and M Zareinejad
